project44's Advanced Visibility Platform provides the high-fidelity data needed to fuel your transportation supply chain. Built on top of a modern digital infrastructure, our platform is designed to ingest, cleanse, and normalize high-quality data from a wide network of global carriers to deliver complete visibility into your shipments.

project44's Advanced Visibility Platform

Purpose Built Applications

project44's easy to use applications are purpose-built on top of the Advanced Visibility Platform, creating a seamless and automated process.

System Interoperability

p44 seamlessly integrates with the systems you rely on every day, feeding data into your TMS, ERP, OMS and more—without any lag time—to ensure everyone's working off the same information.

High-Fidelity Inputs with Normalized Outputs

The platform cleanses, normalizes and enriches all transformation information into a format everyone in your team can act on, informing smarter and more proactive decision-making from day one.

A Global Network Built for Scale

Through direct API connections and integrations with more than 800+ global ELD/telematics devices, p44 captures the most timely and high-fidelity transportation data across modes and geographies.

Our platform is connected to thousands of carriers worldwide, including integrations with over 800 ELD and telematics devices, across all modes and geographies.

A Global Network Built for Scale

An Extensive Global Network

With project44, growing your visibility coverage doesn't require finding new applications for each new mode or geography. Our platform is already connected to thousands of carriers worldwide, including integrations with over 800+ ELD and telematics devices, across all modes and geographies.

High-Fidelity Inputs with Normalized Outputs

Data Integrity

We cleanse, normalize, and fix inconsistent data to deliver high-fidelity insights you can trust.

Data Privacy

Data security and privacy are the highest priority to us, which is why we are the only platform that is fully GDPR compliant.

System Interoperability

Flexibility

Built on a digital infrastructure, you can plug the Advanced Visibility Platform into your existing systems and processes to reduce disparate systems and create a connected and consistent experience.

Beyond Tracking

Request rates, dispatch freight loads for pick up, get on-demand freight insurance, and manage all settlement documents and invoicing via project44 to keep everything in the same system.

System Reliability

Running on the most reliable and modern technology infrastructure, complete with numerous redundancies and constant monitoring, ensures you have consistent access to your data.

Purpose Built Applications

Visibility Operations Center (VOC)

See every shipment at any time with the VOC, allowing every party in your supply chain to achieve end-to-end visibility into global, multimodal transportation.

Network Management Center® (NMC)

A fully automated, transparent, and secure method for carrier onboarding, the NMC enables you to rapidly connect North American and European truckload providers into project44.

Our Platform is Trusted by Leading Global Brands and Logistics Service Providers

GE Transportation
